Art Unit 1713

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Ciocca et al., U.S. Patent 5,766,772 or Hackhbl et al., U.S. Patent 3,048,266 or European Patent Application No. 1055610 each taken alone or further in view of Unithox Technical Release No. 4022.0.

The Ciocca patent shows the polyoxyethylene ether of a fatty acid alcohol as being component III utilized in polyolefinic films. See specifically column 2 lines 55+. Hackhbl et al. and the European patent application each show polyolefinic film compositions which can have ethoxylated alcohols added thereto. See specifically Hackhbl at column 1 lines 40+ and the European patent application at pages 4 and 5. These patents generically disclose the specifically claimed ethoxylated alcohol compound. The Examiner maintains that the generic disclosure of the compounds within these references renders obvious the specifically claimed compound as instantly claimed. As such, one

Art Unit 1713

of ordinary skill in the art would be motivated to select the ethoxylated alcohol compound as claimed given that it is a commercially available ingredient.

The Technical Release by Unithox further shows applicants' instantly claimed compound and identifies many various uses for this compound. The Examiner maintains that one of ordinary skill in the art would be motivated to select such a commercially available ingredient when directed to do so by the primary references. As such, the claims are rendered prima facie obvious.
